\*For non-auto models, water level switch is required to be set at a minimal off point of 10 inches to meet dust-ignition proof certification requirements.

Additional cord lengths are available in 25' (7.6 m), 35' (11 m) and 50' (15 m).

All Models are, cCSAus certified for hazardous gas or dust locations.

Tested to FM Standards 3600 & 3615 & 3616 by CSA

## SELECTION GUIDE

1. See FM1705 for correct intrinsically-safe simplex or duplex panel
2. See FM0526 for variable level control switches rated 30VDC are used as a control activator. Quantity required dependent upon panel selection.
3. Automatic pump with integral float-operated mechanical switch; no external control required
4. Automatic pumps: Use the optional seal-failure panel (10-1031) to Activate the moisture sensor circuit for pump protection and when required by local codes

**CAUTION** All installation of controls, protection devices and wiring should be done by a qualified licensed electrician. All electrical and safety codes should be followed including the most recent National Electrical Code (NEC) and the Occupational Safety and Health Act (OSHA).
